Operational disruptions to RIX system

The Riksbank's payment system (RIX) is currently encountering operational disruptions. These disruptions are affecting payments between the banks. They are not affecting payments made by Swish or card.

Operational disruptions in the RIX system are very rare. The work of tracing the error has been given high priority. The Riksbank is cooperating with the commercial banks and other interested parties in order to ensure a return to normal routines as quickly as possible. The Riksbank will provide more information throughout the day.
