## Information on gold coins from 1925

It has come to our attention that there are unconfirmed reports in coin guides that the Riksbank has a large stock of 20-krona coins in gold from the year 1925 and with Gustav V as motif. The Riksbank has only 47 of these coins left. The remainder have been melted down or sold at auction around the world. This occurred during the 1980s and 1990s.
